

# **Sexual Misconduct Cases:**

Presentation to the Washington Board of Massage

May 13, 2016

# Summary

- As part of the rulemaking process, the Board and the Department have proposed rules on a number of controversial issues including massage of the breasts and required draping.
- One request of interested stakeholders has been to provide more details on discipline related to the touching of breasts.
- DOH's IT systems do not track case information at such a detailed level to be able to extract cases limited to this subject.
- However, we do have case summaries available going back several years, which are summarized here.

# Summary

- This listing of cases also includes episodes where other sexualized behavior occurs.
- it is reasonable to infer that, where other sexual boundary violations occur, it would not be appropriate or safe to allow massage of the breasts.
- I have not included cases where there is a clear indication of prostitution or unlicensed practice.
